

KAIJA COLLETTE

Full Stack Developer

📞 2406204573 @ kaijam7collette@email.com 🌐 <https://github.com/caperatel7>

SUMMARY

Skilled and motivated Developer with experience with multiple tech stacks and in different team settings. Committed to delivering high-quality results and working collaboratively in a dynamic environment. Adept at leading Agile teams while exemplifying a high-level professional capable of delivering exceptional results in the realm of software development and IAM architecture.

EXPERIENCE

Full Stack Developer IAM

LegalEase

📅 2022 - Present

- Established backend framework using Node. Working with REST API Controllers, Queries, Models to retrieve information Databases. Led projects that featured normalizing redundant data in one to one and many to many relational databases on phpMyAdmin with mySQL.
- Created layout/user interfaces by utilizing Figma to create mockups for design visualization and iteration for standard UX/CSS practices. Integrate software components and third-party programs to meet specifications. Along with the Implementing functionalities and attributes with JavaScript and React
- Leds team based Agile Approach environments using platforms like Jira and Bitbucket. Creating team friendly environments for code reviews and approving pull requests. Led bi-weekly Sprint Reviews and Backlog Refinements to further understand exactly where the team's progression was and the steps we need to take to reach our next goal.
- Designed IAM architectures for secure and efficient access control. Deployed MFA solutions to strengthen authentication processes. Implemented SSO solutions using protocols like OAuth. Also
- Created and managed role-based access control (RBAC) policies. Designed IAM architectures for secure and efficient access control. Utilized phpMyAdmin to manage MySQL databases, including creating, modifying, and deleting tables, indexes, and views to ensure accurate and efficient data storage.
- Proficient in version control systems like Git, effectively managing codebase changes, facilitating collaboration among team members, and ensuring code integrity throughout the development lifecycle.

Software Engineer / Data Analysis

PCS Software

📅 2020 - 2021

- Independently work on a Full Stack platform creating multiple Features and Stories for the company's Q2 major release. Using React, JSX for the Web UI using Functional and Class Components and Redux
- Demonstrate the ability to adapt and work with team members of various experience levels. Experience with version control systems like Git. Analytics, and machine learning tools to drive innovation. Ability to test and debug existing software and correct defects.
- Created and refined database schemas to align with business requirements, ensuring normalized structures and scalability for future enhancements.
- Created a single-page application using React.js, integrating RESTful APIs for dynamic content delivery. While Implementing reusable components for efficient navigation and user interaction.
- Orchestrated Agile-based project initiatives, including Scrum methodologies, ensuring efficient team collaboration and timely delivery of high-quality software products. Facilitated regular meetings with stakeholders to gather feedback, prioritize requirements, and align project goals with organizational objectives.

STRENGTHS

Problem-solving skills

Solved complex coding problems using React and Python resulting in faster application performance.

Team player

Collaborated with cross-functional teams to develop and deliver high-quality products in an agile environment.

Attention to detail

Ensured code quality and accuracy through rigorous testing and review processes.

SKILLS

React	TypeScript	SQL	REST API
Figma	Javascript	HTML/CSS	AWS
IAM	phpMyAdmin	Jira	Bitbucket
Git	UX/UI	Object Oriented Programming	
Project Management		Risk Assessment	
Python	Clickup	Azure	Node.js
Adonis.js	Docker	Visual Studio Code	

EDUCATION

Bachelor of Science - Informatics,
Interactive User Experience Concentration
University at Albany

- Former Division 1 Student Athlete
- Minor - Emergency Preparedness, Homeland Security and Cybersecurity

Masters of Science - Technology Project
Management

University of Houston

- Summa Cum Laude

KEY ACHIEVEMENTS

Leading a cross-functional team

Successfully led a team of developers, designers, and product managers to deliver a complex web application on time and within budget.

Contributing to Access Control Setup

Led the implementation of role-based access control (RBAC) policies and designed secure IAM architectures, ensuring efficient access control and bolstering cybersecurity measures within the organization.
